Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 8-12-2010 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 35-48 are rejected under 35 U.S.C. 102(e) as being anticipated by Mohammed (20050207395).

Regarding claim 35 Mohammed discloses a wireless transmit/receive unit, comprising (fig. 1-2, 7):

a transmitter (12, fig. 1-2, see para. # 0032) configured to send a request for information regarding available channels to a server (18, fig. 1) connected to the Internet (30, fig. 1) and coupled to a database (24, fig. 1) wherein the database (24, fig.

1) is configured to contain information regarding available channels (para. # 0068-0069);

a receiver configured to receive over a first communication interface information regarding the available channels received from the database (a channel number, a slot number and a handoff reference receive by the subscriber device 12 from the system server 24 and the base station, para. # 0069); and

a processor configured to determine whether to switch to a second communication interface based on the information received from the database regarding the available channels (both links are simultaneously active, control of the communication session is switched from the licensed wireless circuitry 118 to the unlicensed wireless circuitry 114, the subscriber device 12 is processing both licensed wireless signals and unlicensed wireless signals at this point. The handoff module 126 can coordinate this operation, para. # 0066, 0070 and 0072).

Regarding claim 36 Mohammed discloses wherein the request includes WTRU capability information (para. # 0066-0070).

Regarding claim 37 Mohammed discloses wherein the request includes WTRU location information (para. # 0066-0070, 0086).

Regarding claim 38 Mohammed discloses wherein the WTRU capability information includes authentication information, protocol information and a maximum transmission power (para. # 0066-0070, 0086).

Regarding claim 39 Mohammed discloses wherein the WTRU switches to the second communication interface based on the information received from the database regarding available channels (para. # 0066-0070, 0086).

Regarding claim 40 Mohammed discloses wherein the WTRU receives updated channel information (para. # 0066-0070, 0086).

Regarding claim 41 Mohammed discloses wherein the information received regarding available channels includes a maximum transmission strength (para. # 0066-0070, 0086).

Regarding claim 42 Mohammed discloses an apparatus, comprising:

a receiver configured to receive a request for information regarding available channels wherein the apparatus is connected to the Internet and coupled to a database and wherein the database is configured to contain information regarding available channels (para. # 0068-0069);

a transmitter configured to transmit the information regarding the available channels received from the database over a first communication interface (para. # 0068-0069, fig. 1-2,7); and

a processor configured to determine whether to switch to a second communication interface based on the information received from the database regarding the available channels (para. # 0066-0070, 0086).

Regarding claim 43 Mohammed discloses wherein the request includes capability information (para. # 0066-0070, 0086).

Regarding claim 44 Mohammed discloses wherein the request includes location information (para. # 0066-0070, 0086).

Regarding claim 45 Mohammed discloses wherein the capability information includes authentication information, protocol information and a maximum transmission power (para. # 0066-0070, 0086).

Regarding claim 46 Mohammed discloses wherein the apparatus switches to the second communication interface based on the information received from the database regarding the available channels (para. # 0066-0070, 0086).

Regarding claim 47 Mohammed discloses wherein the apparatus receives updated channel information (para. # 0066-0070, 0086).

Regarding claim 48 Mohammed discloses wherein the information received regarding available channels includes a maximum transmission strength (para. # 0066-0070, 0086).

Response to Arguments

4. Applicant's arguments with respect to claims 35-48 have been considered but are moot in view of the new ground(s) of rejection.
